Köln, 05.12.2000

Dr. Ha/hr

Dear Mr. Taramzhenin,

being back in Germany I would like to thank you for the cooperation.

Since 1990 I travel a lot in Central and Eastern Europe to speak about the market changes. So I think that I can judge about the state of the art of the conferences and speakers.

Being with you in Riga and in Kiev, I only can congratulate you for the level of speakers, the themes, the translations into German und English, and also the care you take for foreign speakers to learn more about your environment and problems.

By this programme and by building contacts you bring people together not only at the conference but for a continues action. As a result of your Riga-conference, we had at the Retail Technology Show in Düsseldorf already visitors from your country. I think that this is very important especially for small and medium-size companies which urgently need a catalyst for innovations.

Being since 1986 also president of an international network of research institutes including the USA and Japan I offer the RMS to become free of charge its representative of the Baltic-area. By separate letter my assistant will inform you about the activities of that network called ISSO.

For today I remain  
yours sincerely

Mit freundlichen Grüßen

Dr. Bernd Hallier
